Backend: Spring Boot, Node.js, REST APIs

Frontend: Vue.js, HTML5, CSS3

Databases: PostgreSQL, SQL

Tools: Git, GitHub, Docker, IntelliJ IDEA

Concepts: Systems Analysis, Workflow Design, API Integration, Data Modeling, System Design

PROFESSIONAL EXPERIENCE

Web Designer & Developer | Freelance

Jan 2025 – Present | Columbus, OH

- Translate business requirements into structured application and system designs for full-stack web applications
- Develop API-driven systems using Java, Spring Boot, and Vue.js to support data-rich user workflows
- Integrate external APIs (Yelp Fusion, Google Maps, News APIs) to unify fragmented data sources into a single user experience
- Design and implement user workflows and interfaces focused on usability, consistency, and decision support
- Manage full project lifecycle including requirements gathering, development, testing, and deployment

IT Consultant | Freelance

Jun 2022 – Jan 2025 | Columbus, OH

- Designed and implemented containerized infrastructure using Docker Swarm to improve system reliability and deployment consistency
- Assessed system requirements and translated them into scalable infrastructure improvements focused on redundancy and stability
- Completed 400+ hours of training in systems administration, networking, and cloud fundamentals

Route Manager | Clean, Inc.

Jul 2007 – Feb 2019 | Dublin, OH

- Managed and optimized daily routing, scheduling, and client service workflows for 50–80 clients
- Coordinated field operations for a 2–4 person team, ensuring efficient task allocation and service delivery
- Identified workflow inefficiencies and adjusted processes to improve client retention and service consistency
- Managed operational systems including invoicing, routing, scheduling, and service tracking to maintain business continuity

Property Manager | LELORR Properties, LLC.

Apr 2013 – May 2015 | West Jefferson, OH

- Managed operations for 33 residential rental properties including tenant communication and maintenance coordination
- Created structured leasing and documentation processes to improve operational consistency
- Coordinated vendors and contractors for timely maintenance resolution
- Maintained financial and compliance records for property operations

Office Manager | OCMS, Inc.

May 2012 – May 2015 | Plain City, OH

- Managed administrative operations including invoicing, payroll, and customer data tracking
- Improved internal workflows through structured filing and documentation systems
- Created business branding materials using Adobe tools
- Supported cross-functional operations across accounting and customer service

TECHNICAL PROJECTS

Jolt Coffee Shop Locator | Dec 2023 – Dec 2024

Full-Stack Web Application

- Independently redesigned and expanded a collaborative capstone into a full-stack business discovery application
- Integrated Yelp Fusion API to aggregate and normalize real-time business listings
- Expanded user workflows with profile management, favorites, and improved application architecture
- Designed responsive user interfaces using Java, Spring Boot, PostgreSQL, and Vue.js

Tech Stack: Java, Spring Boot, PostgreSQL, Vue.js

Best Buds Dispensary Locator | Mar 2024 – Present

Full-Stack Web Application

- Built a multi-source decision support system integrating mapping, business, and informational APIs into a unified user experience
- Integrated Google Maps, Yelp Fusion, and News APIs for real-time data aggregation
- Implemented user authentication and personalization features
- Designed structured workflows for multi-device usability

Tech Stack: Java, Spring Boot, PostgreSQL, Vue.js

EDUCATION & TRAINING

Tech Elevator | Remote

Sep 2023 - Dec 2023

- Full-Stack Java Bootcamp (800+ hours)

Ohio State University | Columbus, OH

Jan 2009 - Dec 2009

- 111 total college credit hours completed toward a B.S. Architecture degree (including transfer credits)

Marion Technical College | Marion, OH

Sep 2006 - Jun 2008

- Dean’s List • CCNA Certification
